

E-Portfolio Content — DUSHIME Teta Ella

Personal Brand / Identity

I am an aspiring businesswoman, leadership enthusiast, digital commerce enthusiast, and creative designer from Rwanda who is passionate about combining leadership, business, technology, and creativity to create solutions that help people and communities. I enjoy learning new skills, exploring entrepreneurship, and using technology as a tool for innovation and impact.

I am currently a student at Liquidnet Family High School at Agahozo-Shalom Youth Village, where I study Mathematics, Physics, Geography, and Economics (MPGE). Alongside academics, I actively participate in leadership programs, technology initiatives, entrepreneurship activities, and community service.

My goal is to grow into a successful entrepreneur, leader, and digital commerce professional who uses creativity and technology to solve real-world problems while inspiring other young girls to believe in themselves, become confident leaders, and explore opportunities in business and STEM.

Title

DUSHIME Teta Ella

Subtitle

Aspiring Businesswoman | Digital Commerce Enthusiast | Creative Designer

Short Introduction

I am passionate about leadership, entrepreneurship, technology, creativity, and personal growth. I enjoy designing digital content, exploring business ideas, and learning how technology can improve lives and communities.

About Me

I am a motivated and curious student who enjoys learning beyond the classroom. My interests are centered around leadership, business, digital commerce, entrepreneurship, technology, creativity, and community impact.

I believe that young people can use technology and innovation to create positive change in society. Because of this belief, I actively participate in programs and activities that help me grow my skills in communication, teamwork, technology, and problem-solving.

I also enjoy creative design work using tools like Canva and Figma, where I create digital designs such as Save the Date templates and visual projects. In the future, I hope to build my own successful business while continuing to grow in the technology and digital commerce world.

Programs & Experiences

Access English Program

Participant in the English Access Microscholarship Program, where I improved my English communication, leadership, confidence, teamwork, and presentation skills through academic and community-based activities.

HerInTech Summer Camp

Participated in HerInTech Summer Camp and learned technology and design skills including HTML, CSS, JavaScript, and Figma. The experience strengthened my passion for combining creativity and technology.

Programming Classes

Attended beginner programming classes and explored coding fundamentals including HTML, CSS, and C++.

Clubs & Leadership

Girl Up Club

Participated in activities focused on empowering girls and supporting young women in the community.

Business Club

Explored entrepreneurship concepts, business ideas, and teamwork through school-based projects and discussions.

Economic Club

Learned financial and economic concepts while developing interest in financial literacy and business thinking.

Pay It Forward Club

Contributed to community service activities and teamwork projects focused on helping others.

Projects

Save the Date Design Business

Started designing creative Save the Date templates using Canva with the goal of building a digital design business.

Homefinder Website Concept

Worked on a website idea focused on helping people explore and find homes online while learning web development and design concepts.

STEM & Technology Projects

Participated in group technology and presentation projects involving creativity, teamwork, and innovation.

My Vision

I want to become a successful entrepreneur and digital commerce professional who combines technology, creativity, and business to create opportunities and solutions for people.

I also want to inspire young girls to believe in themselves, develop leadership confidence, learn technology skills, and confidently pursue opportunities that can positively change their future.

Suggested AI Prompt For Portfolio Design

Create a modern, elegant, and professional student e-portfolio for a young aspiring businesswoman and digital commerce enthusiast from Rwanda. The portfolio should reflect leadership, creativity, entrepreneurship, technology, and personal growth.

Use a black, gold, and white color palette with a clean and modern layout. Include smooth animations, modern fonts, professional sections, and a stylish but minimal design.

The portfolio should contain the following sections:

- Hero Section
- About Me
- Skills
- Programs & Experiences
- Clubs & Leadership
- Projects
- Vision & Goals
- Contact Section

The personality of the portfolio should feel ambitious, leadership-driven, creative, elegant, youthful, professional, inspiring, and future-focused.

The portfolio should highlight interests in:

- Business
- Entrepreneurship
- Digital Commerce
- Technology
- Creativity
- Leadership
- Design

Add modern cards, section transitions, icons, and responsive mobile-friendly design.
